Profile

I'm a career changer with 5+ YOE in data analysis

Skills

Programming Languages C, C++

Development Tools Git, GitHub Actions, Linux, Make, GDB

Projects

Web Server - HTTP Server from scratch 

- Engineered a low-level C++ HTTP server via POSIX sockets, handling TCP connections and serving static HTML, CSS, Javascript, and image files
- Delivered full GET, POST, and DELETE support with spec-compliant status codes and response header
- Enabled concurrent browser and client support via poll-based non-blocking I/O without threads

Angry Cube - A pseudo 3D game 

- Implemented the rendering algorithm used in the classic Wolfenstein 3D game
- Showcased initiative by creating an end-to-end gameplay that extends beyond the project's requirements
- Implemented unit tests for logical components of the game
- Improved project reliability and efficiency by implementing automated workflows using Github Action to test and build the game

SuperShell - A lightweight shell interpreter 

- Built a lexer and tokenizer for commands to be executed
- Practiced collaborative problem solving by co-designing a parser based on the lexical analysis
- Created a pipeline structure to execute user's commands
- Implemented unit testing to ensure the robustness of the code base

Huff - A text compression tool 

- Implemented the Huffman algorithm to compress texts

Cfit - An activity visualizer 

- Explored a Developer Kit library for Garmin devices
- Analyzed the activity data and created a visualization using Raylib

Dining Philosophers - Concurrency and Parallelism 

- Implemented a multithreaded and multiprocess program to solve the classic dining philosopher problem using POSIX pthread and semaphore

Professional Experience

Senior Data Analyst (*Financial Recovery Technologies*)

2019-2024

- Exercised full accountability and project management skills by overseeing the lifecycle of a class action case
- Crafted PL/SQL scripts to automate calculation of clients' entitled losses

- Translated highly technical legal and financial data into clear, actionable information for diverse clients
- Mentored junior team members on case management best practices, fostering a culture of knowledge sharing and problem solving

Education

Hive Helsinki	Software Engineer
Suffolk University	Master in Business Analytics
Northeastern University	Bachelor in Finance and Accounting Management
